

CORNING

Get No-Fuss Installation for FTTH.

Our Thin-Film Bundled Drop (TFBD) was developed to streamline the last-mile, fiber-to-the-home (FTTH) customer connection process by eliminating the need for additional ducting and significantly reducing overall installation time. It's the perfect choice for various deployment methods such as direct-buried installation or trenching.

Based on Decades of Indoor and Outdoor Cable Innovation

Eliminates Traditional Ducts and Fiber Blowing

Slim Profile

13.8 mm Cable Diameter
4.6 mm Drops

No Traffic Disruption

20 mm Width Trench Along the Road and 10 mm to the Home

Field Tested and Proven

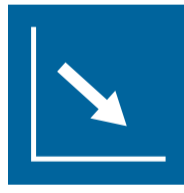

Compliant with FTTH Architectural Standards

21% faster deployment time
than blown installation

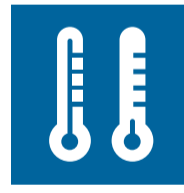

24% lower total cost of ownership
than traditional duct installations

Less plastic
than traditional duct cable deployments

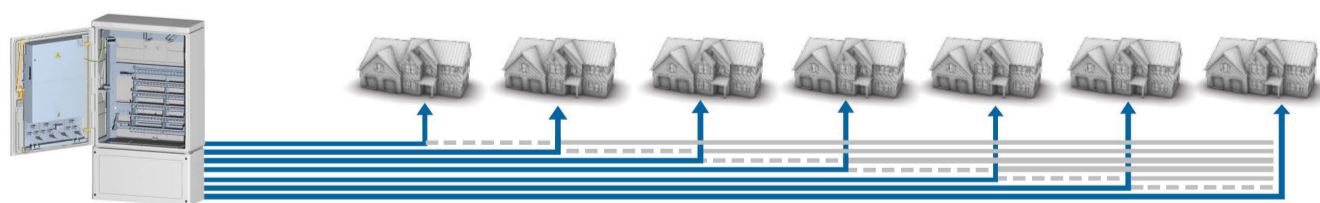

Delivered on thin drums
for simultaneous installation of multiple drop bundles

Ready for the harshest environment
-25°C to 70°C

Just Trench, Cut, and Drop

No junction closures or splicing

Fiber Distribution Point

Bundle of 7 x 4.6 mm Customer Drop Cables with 4-12 Fibers
