

Corning Recycles

You can make a difference.
 Don't throw away your Corning®, Falcon®, or Axygen® product packaging.

At Corning Life Sciences, we believe that end-of-life recycling opportunities are an important enabler for a cleaner environment and the wise use of material resources. Creating a sustainable lab can be a difficult and overwhelming task; with this in mind, we offer customers free participation in our recycling program.

Protecting the environment with Corning is simple.

Step 1

Place the recyclable materials from the listed Corning, Falcon, or Axygen products in a box. Pack the box tight to minimize the climate impacts of shipping. Select items are allowed for recycling.

Step 2

Go to www.corning.com/recycles and print a postage-paid mailing label.

Step 3

Affix the mailing label to the box, seal it for mailing (if reusing boxes, remove prior shipping labels and any product description information), and send it via UPS or FedEx to our recycling partner.

Thank you for helping to preserve our environment and choosing Corning brands. For more information about this program please contact your Corning Account Manager.

Accepted in Corning Recycles

Corning, Falcon, and Axygen acceptable product packaging only. ✓

Pipet tip racks and lids (resin code #5)

Centrifuge tube Styrofoam racks

Select product packaging*
