

CORNING | Everon[®] Network Solutions

An aerial night view of a city skyline, likely Kuala Lumpur, featuring the Petronas Twin Towers and the Kuala Lumpur Tower. The city is illuminated with various lights, and several glowing blue lines are overlaid on the image, representing a network or data flow. The lines start from the bottom left, curve around the city, and end near the top right, connecting different parts of the urban landscape.

A Powerful New Way to Network

More capability. Lower cost.

Demands on enterprise networks are growing every day. From 5G and IoT to video and rapidly multiplying devices and applications, our world requires more bandwidth. With this ever-expanding expectation, keeping your employees and customers connected and productive can feel like a never-ending challenge. Corning® Everon® Network Solutions are the complete, enterprise-grade solutions you've been looking for.

Flexible, Future-Ready Options For Your Enterprise

Whether you need optical backbone solutions or connectivity to the edge of your network, Everon Network Solutions let you build for today while scaling for the future.

- Built on trusted optical fibre technology
- Supported by an expert technical team deeply committed to customer service
- Enables wired and wireless connectivity on a single network
- Provides up to 30% total savings on materials and labour at installation and up to 50% on future upgrades

The Future of ENTERPRISE NETWORKS

Designed With You, for You.

Our passion is innovation with purpose. To develop network solutions that solve your real-world needs, we continuously collaborate with carriers, data centres, and enterprise customers worldwide. From the largest stadium to the smallest office building, we work with you to anticipate the future of networks, so you'll be equipped for success.

Streamlined Solutions for Your Business

Corning® Everon® Network Solutions are designed to scale, providing you a cost-effective way to get the capability you need, at any size.

1 Campus Backbone

A complete transport infrastructure for connectivity across campus environments. Whichever Everon® Network Solution is right for you, it's built on our proven outside plant backbone and is designed to reduce installation time and scale as your needs grow.

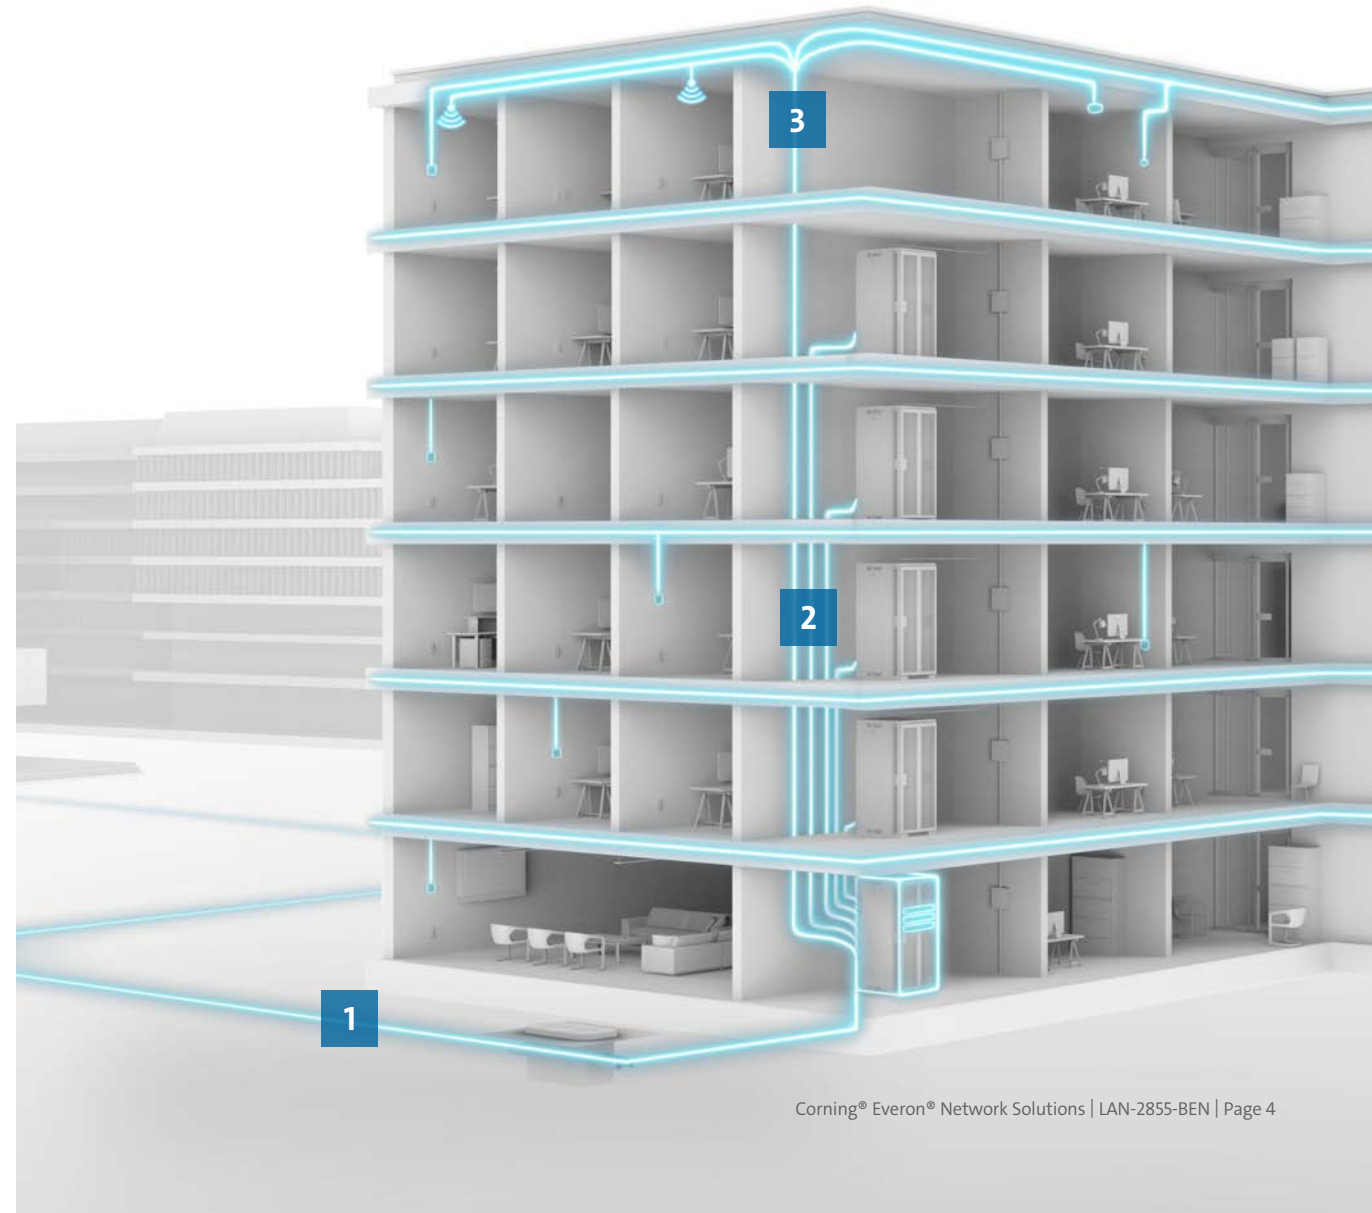

2 Building Backbone

An integrated, completely optical solution that provides fast installation and turnup times with outstanding performance. It's the backbone proven by enterprises around the world for future-ready reliability and ease of integration. Traditional copper solutions are also available from our complete copper portfolio.

3 Horizontal and Fibre-to-the-Edge

Proven, Seamless Integration — Together, our optical backbone and remote powering deliver a network solution that provides better performance than traditional Ethernet solutions.

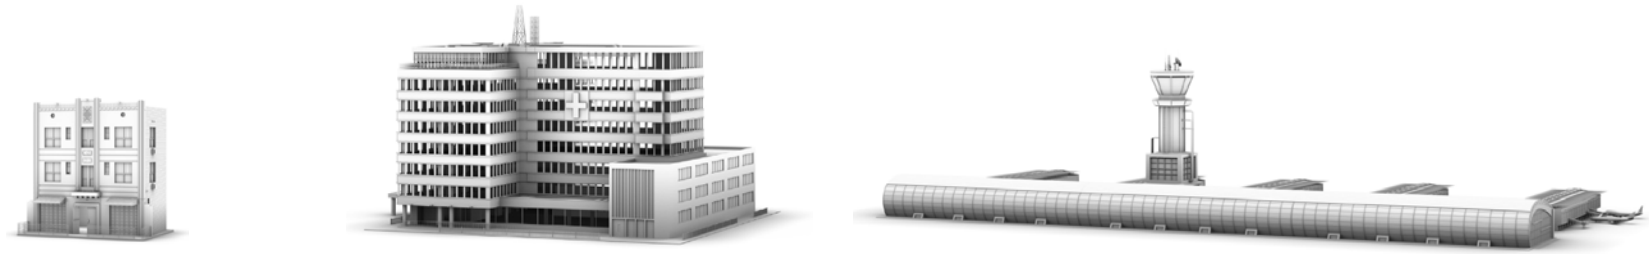

- **Remote Powering** — Provides PoE, PoE+, and PoE++ powering over a hybrid fibre-copper architecture for easy power delivery for distances exceeding 600 metres.

A Powerful Solution for Every Enterprise, Large and Small

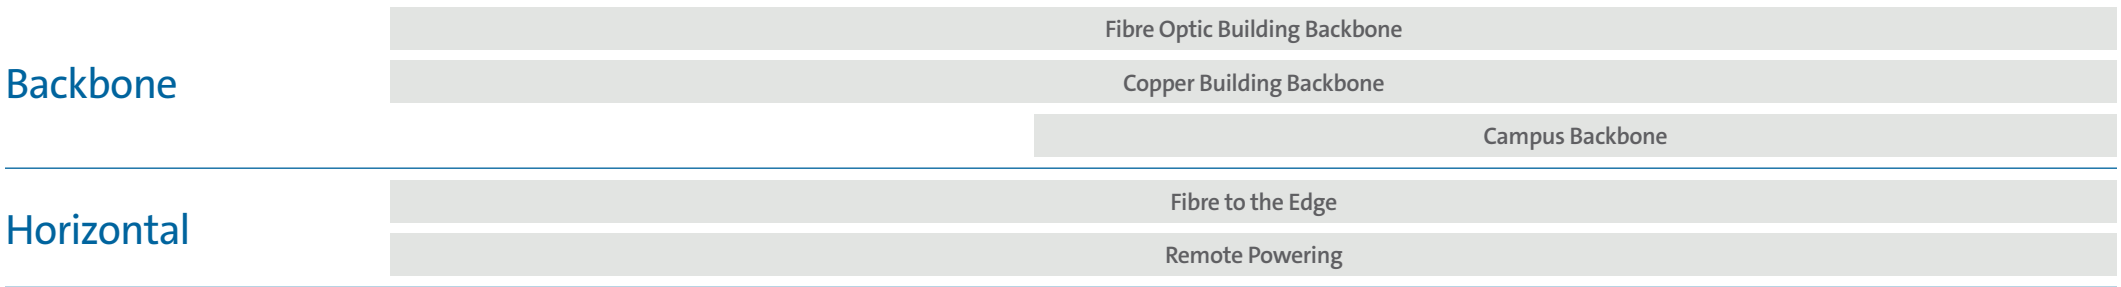

Corning® Everon® Network Solutions combine wired and wireless connectivity in one scalable, future-ready network.

Small/Medium Buildings

Large Buildings

Large Venues/Facilities

Are you ready to connect
to a more **POWERFUL**
way to network?
